

Md Bodrud-Doza, PhD

Postdoctoral Scholar | Department of Geography, Environment and Geomatics | University of Guelph

Resilient Agricultural Landscapes and Sustainable Food Production

mbodrudd@uoguelph.ca | Guelph, Ontario, Canada | [Academic website](#)

[Google Scholar](#) | [ORCID](#) | [LinkedIn](#) | [GitHub](#) | [ResearchGate](#) | [ScienceDirect](#)

ACADEMIC PROFILE

Environmental scientist and geographer specializing in agricultural water quality, precision conservation, watershed modelling, and geospatial decision support. My research integrates environmental monitoring, GIS, machine learning, and process-based models to plan and evaluate conservation across agricultural landscapes. Current postdoctoral work extends this foundation toward adaptive environmental decision support, Earth observation and GeoAI, and food-system resilience. I also bring substantial experience in climate adaptation, science-policy practice, partnership development, and research proposal development across academic, government, NGO, and private-sector settings.

RESEARCH AREAS

Agricultural water quality | Precision conservation and conservation planning | Watershed modelling | Environmental monitoring | GIS and geospatial analysis | Machine learning | Environmental decision support | Climate resilience | Earth observation and GeoAI (emerging) | Food-system resilience (developing)

EDUCATION

PhD in Geography

September 2022 - August 2026

University of Guelph | Guelph, Ontario, Canada

Thesis: Advancing Precision Conservation in Tile-Drained Agricultural Watersheds through Integrated Geospatial Analysis, Machine Learning, and Process-Based Modeling.

Research focus: precision conservation, agricultural water quality, geospatial analysis, machine learning, and process-based watershed modelling.

MSc in Environmental Sciences

2014

Jahangirnagar University | Bangladesh

Thesis: An integrated approach for groundwater pollution evaluation of Dhaka City using multivariate statistical analysis, groundwater pollution indices, geostatistical modeling, and human health risk assessment.

BSc (Honours) in Environmental Sciences

2010 - 2013

Jahangirnagar University | Bangladesh

Project: Assessment of Groundwater Quality in Dhaka District Using GIS and Multivariate Statistical Techniques.

ACADEMIC AND RESEARCH APPOINTMENTS

Postdoctoral Scholar

September 2026 - Present

Department of Geography, Environment and Geomatics, University of Guelph | Guelph, Ontario, Canada

- Lead active Mitacs Accelerate research in the Healthy Lake Huron context; Ausable Bayfield Conservation Authority (ABCA) is the formal Mitacs partner.
- Integrate long-term watershed monitoring, process-based modelling, conservation and climate scenarios, environmental indicators, and practical decision support.
- Developing REAL Decision Lab, a research program focused on resilient agricultural landscapes and sustainable food production.

Graduate Research Assistant

May 2024 - August 2026

Department of Geography, Environment and Geomatics, University of Guelph | Guelph, Ontario, Canada

- Conducted distributed process-based watershed modelling to evaluate agricultural conservation practices in tile-drained landscapes.
- Integrated GIS, statistical methods, machine learning, and Agricultural Conservation Planning Framework (ACPF)-based planning for field-scale conservation and Great Lakes water-quality management.
- Collaborated with Environment and Climate Change Canada, Iowa State University, and academic partners.

Data Analyst

June 2024 - August 2024

Ausable Bayfield Conservation Authority | Ontario, Canada

- Applied statistical and machine-learning approaches to long-term water-quality data from a Lake Huron tributary.
- Supported watershed interpretation and development of monitoring and quality-assurance plans.

RESEARCH FUNDING, GRANTS, AND PROPOSAL DEVELOPMENT**Current and Awarded Research Support**

- Mitacs Accelerate (2026 - present) - active postdoctoral research supporting Healthy Lake Huron watershed monitoring, modelling, indicators, and conservation decision support; ABCA is the formal Mitacs partner.
- Environment and Climate Change Canada (2024 - 2026) - PhD project funding supporting agricultural watershed and precision-conservation research.

Submitted and Under Review

- Ontario Ministry of Agriculture, Food and Agribusiness (OMAFRA) - Field-Specific Precision Conservation for Cost-Effective Water Quality and Ecosystem Benefits in Ontario's Lake Erie Basin. Contributed to proposal development with lead applicant Dr. Prasad Daggupati; submitted and under review. Funding is not confirmed.
- Canada Postdoctoral Research Award (CPRA) program - submitted application for proposed food-system resilience and anticipatory decision-making research. No award or fellowship funding is confirmed.

Professional Proposal Development and Resource Mobilisation

- BRAC - contributed to and led proposal development that secured more than USD 10 million through 14 successful proposals; co-designed additional projects intended to mobilize up to USD 100 million and co-led BRAC's accreditation to the Green Climate Fund as a Direct Access Entity.
- CARE Bangladesh - co-authored a successful ecosystem-based adaptation proposal that secured €35 million from the UK Foreign, Commonwealth & Development Office (FCDO).

SELECTED AWARDS AND HONOURS

2025-2026	Ontario Graduate Scholarship (OGS), University of Guelph.
2025	Cecil H. Franklin Graduate Scholarship in Soil & Water Conservation, University of Guelph.
2025	Ted Symons Scholarship, University of Guelph.
2024, 2025	GEG Graduate Publication Award, University of Guelph.
2023	Arthur D. Latornell Graduate Scholarship, University of Guelph.
2023	Three Minute Thesis (3MT) College Heat Winner, College of Social and Applied Human Sciences, University of Guelph.
2022	International Doctoral Tuition Scholarship (IDTS), Special Dean's Award, and Kiyoko Miyanishi Graduate Geography Scholarship, University of Guelph.

PEER-REVIEWED PUBLICATIONS

Complete list as of October 2026: 60 peer-reviewed journal articles, including 10 first-authored articles. My name is bolded below.

First-Authored Articles

1. **Bodrud-Doza, M.**, Yang, W., Liu, Y., Yerubandi, R., McKague, K., James, D., DeVries, B., & Fraser, E. D. G. (2026). Operationalizing precision conservation: Aligning best management practice prioritization with local needs in agricultural watersheds. *International Soil and Water Conservation Research*, 100688. DOI: [10.1016/j.iswcr.2026.100688](https://doi.org/10.1016/j.iswcr.2026.100688)
2. **Bodrud-Doza, M.**, Yang, W., Liu, Y., Yerubandi, R., Thompson, M., McKague, K., James, D., DeVries, B., & Fraser, E. D. G. (2026). Advancing precision conservation through machine learning for field-level prioritization of agricultural best management practices. *International Soil and Water Conservation Research*, 100688. DOI: [10.1016/j.iswcr.2026.100688](https://doi.org/10.1016/j.iswcr.2026.100688)
3. **Bodrud-Doza, M.**, Yang, W., Liu, Y., Yerubandi, R., Daggupati, P., DeVries, B., & Fraser, E. D. G. (2025). Evaluating best management practices for nutrient load reductions in tile-drained watersheds of the Laurentian Great Lakes Basin: A literature review. *Science of The Total Environment*, 965, 178657. TEACHING EXPERIENCE

Graduate Teaching Assistant

September 2022 - April 2024

Department of Geography, Environment and Geomatics, University of Guelph | Guelph, Ontario, Canada

- Supported laboratories, seminars, student consultation, assessment, rubric review, grading, and exam invigilation across five undergraduate geography courses.
- Courses: GEOG*1350 Earth: Hazards and Global Change; GEOG*2000 Geomorphology; GEOG*3000 Fluvial Processes; GEOG*2480 Mapping and GIS; GEOG*3480 GIS and Spatial Analysis.
- Delivered hands-on instruction in geomorphology and GIS and provided one-on-one technical and academic support to students.

Teaching interests: GIS and geospatial analysis; environmental modelling; watershed science; agricultural sustainability; environmental decision support. Remote sensing and GeoAI are developing areas for future teaching.

PROFESSIONAL AND LEADERSHIP EXPERIENCE

Operation and Business Development Manager

January - August 2022

International Centre for Climate Change and Development (ICCCAD), Independent University, Bangladesh

- Coordinated ICCCAD's research portfolio and Locally Led Adaptation Program, including project implementation, resource mobilisation, partnerships, and capacity development.
- Guided research papers, policy briefs, project reports, stakeholder training, and climate-resilience proposal development.

Consultant - Project Proposal Writer

August - November 2022

CARE Bangladesh

- Co-developed climate-resilience and ecosystem-based adaptation proposals with multidisciplinary teams.
- Co-authored a successful ecosystem-based adaptation proposal that secured €35 million from FCDO.

Consultant

March - August 2022

Ispahani Agro Limited

- Conducted research and assessments on climate-resilient seeds, bio-pesticides, sustainable agricultural investment, ESG, financial inclusion, and smallholder digital services.
- Supported landscape assessment and development of a digital system prototype for smallholder services, supply-chain monitoring, and product traceability.

Manager, Climate Resilience and Development

April 2018 - January 2022

BRAC Climate Change Program

- Led climate-adaptation project development and implementation, environmental and social safeguards, climate-smart agriculture, partnership building, and institutional climate-resilience frameworks.
- Worked with UNDP, government agencies, NGOs, and international donors; produced policy products, GIS outputs, training materials, and national reports connecting research with implementation.

Research Officer

October 2016 - March 2018

International Centre for Climate Change and Development (ICCCAD)

- Conducted climate-adaptation and resilience research, GIS analysis, technical writing, policy research, proposal development, and capacity building.
- Contributed to research on trapped populations, GCF feasibility work, national research planning, cross-border electricity trading, and adaptation technologies.

Junior Consultant

October - December 2016

International Union for Conservation of Nature (IUCN), Bangladesh

- Conducted GIS analysis and mapping to support wildlife conservation planning and Vulture Safe Zone initiatives.

ACADEMIC AND PROFESSIONAL SERVICE

- Peer reviewer for environmental science, water-resource, and sustainability journals, including Journal of Environmental Management, Environmental Research, Journal of Cleaner Production, Journal of Hydrology, Water Research, Agricultural Water Management, and Journal of Hazardous Materials.
- Committee Member, Arrell Food Chair in Food and Society Search Committee, University of Guelph (2023); represented graduate students in faculty hiring review and interviews.
- Member, Canadian Water Resources Association (2025 - present).
- Member, Canadian Geophysical Union (2024 - present).
- Member, Canadian Geomorphology Research Group (2024 - present).

TECHNICAL AND METHODOLOGICAL EXPERTISE

Programming & data science: Python, R, SQL, JavaScript; statistical analysis and machine learning for environmental and geospatial applications.

GIS & Earth observation: ArcGIS/ArcGIS Pro, QGIS, Google Earth Engine, ERDAS IMAGINE, WhiteboxTools, RockWorks, Surfer; terrain and raster analysis.

Watershed modelling & conservation planning: IMWEBs, SWAT/ArcSWAT, SWAT-CUP, Agricultural Conservation Planning Framework (ACPF), scenario analysis, BMP evaluation.

Decision analysis & visualization: Spatial prioritisation and optimisation, multi-criteria decision analysis, SPSS, Tableau, DeltaGraph, geospatial visualisation and dashboard development.

Field & survey data collection: ODK Collect, KoBoToolbox, Google Forms; environmental monitoring and mobile data collection.

Languages: English and Bangla - fluent in reading, writing, speaking, and listening.

SELECTED PROFESSIONAL DEVELOPMENT

- | | |
|---|---|
| • Spatial Data Science: The New Frontier in Analytics - Esri (2024) | • GIS for Climate Action - Esri (2024) |
| • Creating Python Scripts for Raster Analysis - Esri (2024) | • Remote Sensing Image Acquisition, Analysis and Applications - Coursera (2023) |
| • SWAT-CUP Calibration & Validation with ArcSWAT - Udemy (2024) | • Agricultural Conservation Planning Framework (ACPF) Technical Training - Iowa State University & USDA ACPF Hub (2022) |
| • Using LiDAR to Understand Ecosystems - Holland College (2024) | • Climate Smart Agriculture: Fundamentals; Data Management & Information Systems - Holland College (2024) |
| • Net-Zero Food Systems - Arrell Food Institute, University of Guelph (2024) | • Professional Proposal Writing, Fundraising & Donor Relations - BCTCI, Bangkok, Thailand (2019) |
| • Climate and Disaster Risk Financing - BRAC, BRAC University & World Bank Group (2019) | • Research Ethics (TCPS2: CORE 2022) - Government of Canada (renewed 2022) |
